Nagercoil, India.

Experience

2019 May - Current

Aspire Systems Pvt. Limited, Chennai | Software Analyst
(Domain: Oil & Natural Gas)

- Working on understanding client's framework based on ASP.NET and developing web screens and widgets using C#, JavaScript, jQuery, Kendo UI and ASP.NET MVC.
- Converting C++ code to C#. Debugging C# code for improving performance and fixing bugs. Refactoring unit test methods to execute 2500+ test methods in a single go.
- Upgrading existing UI with user-friendly UI (Improving ease of use), mostly relying on Kendo UI, CSS & JavaScript.
- Using Azure DevOps as the primary version control (GitHub integrated) and team management tool. Working with Visual Studio (Primary code editor), Microsoft SQL Server and PL/SQL Developer.
- Collaborating along with a team of developers and QA testers, in developing screens and fixing bugs through Scrum lifecycle.
- I work on simple web projects (Vanilla JavaScript/HTML/Firestore) for personal use. Also, currently working on a [framework/boilerplate](#) based on Blazor (Server side) and few of those can be found on github.com/jjeffrin
